# Dial-A-Flare™ Fastening Tools

- The **Dial-A-Flare™** single adjustment means fewer parts and more positive flare control.
- Fewer parts mean increased durability, increased production, less maintenance, and lower parts costs.
- Parts are a fraction of the cost of competitive models.
- Because it was designed for foam stapling, the Vertex contact trip mechanism is easily and quickly actuated.
- Because of the application, nose and flare parts were designed using “tool steel” to increase durability and promote long life.
- Fast, easy, bottom-staple-loading design makes reloading a snap.
- Designed and built for this tough and demanding industrial application, where tool performance is critical.
- The **Dial-A-Flare™** foam stapler delivers reliable and consistent results day after day, week after week, and month after month.

## Dial-A-Flare™ Foam Stapler models:

- VA0325** Trigger actuated  
**VA0326** Contact trip actuated

## Dial-A-Flare™ Foam Stapler specifications:
