FaceClipper 1000 Pneumatic Clipping Machine

Greater Productivity for Your Clipping Operation

- Easy operation. The Face Clipper 1000 is an economical, high-output single-head clipping machine solution for your clipping needs, installing clips into furniture rails for sinuous spring attachment. This versatile machine clips both straight and curved rails and allows any operator to be productive with proper instruction.
- Adjustable anvil. Can accommodate rails from 5/8" to 2" in height.
- Economical functions. The all-pneumatic FaceClipper 1000 uses no electricity. This machine applies clips more accurately and efficiently than hand application. Fewer moving parts means low service costs, greater productivity, and increased reliability.
- Service and technical support. Vertex Fasteners is committed to providing our customers with world-class customer service and support. Our dedicated regional sales/service technicians are Vertex employees. They know the product, the business, and their customer, and are there to serve you. Vertex also has a well-trained staff of customer service, production, and engineering professionals that are ready and able to assist you.

The FaceClipper 1000 uses 19-gauge, high-strength, all-steel embossed face clips that provide strength, durability, and holding power.

- Integral nails enter rail at different points to prevent splitting and provide superior holding power.
- High-profile, upturned edge to provide an excellent target for easy spring-up and hammer closing.
- Extended polypropylene liner extends past the ends of the clip to prevent metal-to-metal noise.
- Liner and spring locks mechanically lock liner in place and accurately position sinuous springs in clip.
