ProCinch™ Clipping Tool

- Lightweight – 35% lighter than competitive models, meaning higher productivity with less operator fatigue.
- 40% fewer components – fewer problems, less maintenance, and increased productivity.
- Easier to handle – the ergonomic design reduces the overall handle-to-trigger dimension by 13%, which makes the tool feel more comfortable to operators with large or small hands.
- Innovative design – includes the use of composite materials and investment castings to ensure light weight, high quality, low maintenance, and increased durability.
- Vertex Fasteners offers many optional accessories for the ProCinch line, including:
 - Blade jam release devices.
 - Pivoting anvils.
 - Fixtured tools.
 - Tool hangers.
 - Counter balancers.
 - Remote activation.
 - Custom features – Vertex engineers will work with you to analyze your application and design a custom solution.

Patented polycord collation benefits:

- Unlimited shelf life compared to tape-collated clips.
- Ship and handle without breaking.
- Easy to load.
- No residue as with tape-collated clips that can gum up tools, causing increased tool maintenance.
- Welded clips can cause user injuries and can increase tool maintenance.
- Patented “cord lock” collation eliminates jams associated with cords not shearing from clips.
