Hartco to Vertex Part Number Conversion – Domestic

All Vertex ProCinch clips can be used in Stanley Hartco clipping tools and machines, whether strip or roll. In many cases, the Vertex clips will perform better than the Hartco clips due to the Vertex patented "cord-lock" collation system, which prevents jams associated with cords not shearing with the clips.

Strip Clips

Hartco Strip and Coil Clip Part Number Conversion

One to four numbers that designate clip size; no particular meaning to them

HR designates Hartco – these two letters are always the same

HR-CL-24 C

Clip Material or Type

AL = Aluminum
 NAL = Aluminum, Narrow Clip
 C = Cushion Clip (paper lined)
 G = Galvanized
 H = Hard Material
 L = Long Clip

Two to three letters

CL = Strip Clips, Tape Collation
 CLP = Strip Clips, Polycord Collation

S = Short Clip
 S304 = Stainless Steel Type 304
 S430 = Stainless Steel Type 430
 S434 = Stainless Steel Type 434
 T = Removable Tape Collation

CC = Coil Clips, Wire Collation
 CCP = Coil Clips, Polycord Collation
